SUMMARY

A highly motivated Information Systems student with a holistic approach to digital innovation, specializing in understanding complex problems and designing user-centric solutions. Possessing strong analytical skills in system analysis, UI/UX, and object-oriented programming, honed through diverse academic projects. Eager to contribute to cutting-edge development that blends creativity with technical excellence, particularly within a dynamic and impactful environment.

EDUCATION

Institut Teknologi Del – Sitoluama, Indonesia
Bachelor of Information Systems | 2024 – Present
Current GPA: 3.09/4.00

ACADEMIC PROJECTS

Del Clinic Information System Design

Project Analyst & UI Designer (Team-based) | Institut Teknologi Del – System Analysis and Design Course | 2026

- Analyzed current manual clinic processes and designed a web-based integrated medical record system covering online queue registration, digital medical records, and automated sick leave notifications to dormitory and lecturers.
- Developed detailed System Requirement Specification (SyRS) including use case diagrams, use case scenarios, DFD, ERD, and data dictionary for 5 user roles.
- Modeled As-Is and To-Be business processes using BPMN across 4 core workflows, and contributed to UI design for multiple stakeholder interfaces.
- Skills: System Analysis, Requirements Elicitation, Use Case Modeling, Data Modeling, BPMN, UI Design (Figma).*

Child Immunization Schedule Application Design

UI/UX Designer (Team-based) | Institut Teknologi Del – UI/UX Course | 2026

- Designed a child immunization scheduling app through a full UX process — from user research (surveys, interviews) and HMW frameworks to UI style guide and high-fidelity Figma prototype.
- Evaluated design effectiveness through Maze-based usability testing and usability metrics analysis to identify and prioritize interface improvements.
- Skills: User Research, UI Style Guide, Wireframing, Prototyping (Figma), Usability Testing (Maze).*

Academic Record Management (T08 Transcript) - Java OOP Project

Software Developer (Pair Programming) | Institut Teknologi Del – Object-Oriented Programming Course | 2026

- Developed a Java console-based Academic Simulator with a transcript generation module displaying students' course history in strict chronological order across academic years and semesters.
- Implemented repeated enrollment handling logic to display only the most recent grade while retaining full history for accurate GPA computation.
- Applied OOP principles (encapsulation, modular class design) to manage complex relationships between students, courses, enrollments, and lecturers across incremental weekly builds.
- Skills: Object-Oriented Programming (Java), Data Structures & Algorithms, Data Processing, Problem-Solving, Pair Programming, Incremental Development.*

Business Process Analysis and Redesign for Student Leave Permit System at IT Del

Business Process Analyst (Team-based) | Institut Teknologi Del – Business Process Management Course | 2025

- Identified and analyzed inefficiencies in campus permit processes via stakeholder observation, document analysis, and BPMN modeling.

- Performed qualitative and quantitative analysis including root cause analysis, Pareto analysis, and value-added/waste analysis
- Redesigned workflows using Task Elimination and parallelization, replacing physical document processes with a fully digital CIS-integrated system, documented in a structured process redesign report.
- *Skills: Business Process Management, BPMN, Process Analysis, Process Redesign, Stakeholder Elicitation, Technical Documentation.*

ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM) - Institut Teknologi Del

Data and Information Division of Central Department On Campus | February 2026 – Present

- Managed and maintained organizational data pipelines across departmental programs, producing structured reports and formal correspondence distributed to relevant campus stakeholders to support data informed decision making.
- Served as the operational backbone of the department by engineering behind-the-scenes data systems
- *Skills: Project Planning, Data Management, Report Writing, Administrative Coordination, Teamwork*

SKILLS

- **Languages:** Indonesian (Native), English (Intermediate)
- **Programming Languages:** C, Java
- **Version Control :** Git, Github (github.com/Arthasiregar)
- **Hard Skills:** Microsoft Office (Word, Excel, PowerPoint), UI/UX Design (Figma), Prototyping, BPMN, System Analysis, Requirements Elicitation, Use Case Modeling, Data Modeling (DFD, ERD), Business Process Management, Git, Diagramming (Draw.io)
- **Soft Skills:** Critical Thinking & Problem-Solving, Communication & Presentation, Teamwork & Collaboration, Time Management, Adaptability.
